Dances

It is very easy to imple, ment and the student enjoyment is there. We found that student engagement increased across the whole group when they began creating their own choreography. They were engaged and having fun, particularly students who are sometimes reluctant.

As a PE teacher, a huge barrier is not having the theoretical and practical knowledge to teach dance according to the Aus curriculum, however having that planned out and organised by Dance Cart's Online Foundation Program has been very helpful. The content was well scaffolded and had a consistent structure across the lessons.
